

Clinical Visit Note

Aevara Medical Group — Confidential Patient Record

Patient Information

Patient Name	Robert Williams
Date of Birth	1949-05-30
Visit Date	2024-03-18
Provider	Dr. Sarah Mitchell, Cardiology

Chief Complaint

Patient reports occasional dizziness and mild headaches over the past two weeks. Blood pressure readings at home have been consistently elevated.

Diagnosis

ICD-10 Code	M54.5
Description	Essential (primary) hypertension

Clinical Notes

Physical examination reveals BP 158/94 mmHg bilaterally. Heart rate is regular at 72 bpm. No signs of end-organ damage noted on physical exam. Patient denies chest pain, shortness of breath, or vision changes. Fundoscopic exam shows no hypertensive retinopathy.

Treatment Plan

Started lisinopril 10mg daily for blood pressure management. Patient advised to reduce sodium intake and increase physical activity to 150 minutes per week. Recommended dietary consultation and stress reduction techniques.

Follow-Up

Return for follow-up blood pressure check in 4 weeks. Monitor home BP readings daily and keep a log. Contact office if systolic BP exceeds 180 mmHg or if experiencing chest pain or severe headache.
