

Clinical Visit Note

Aevara Medical Group — Confidential Patient Record

Patient Information

Patient Name	Margaret Johnson
Date of Birth	1957-03-15
Visit Date	2023-08-22
Provider	Dr. Sarah Mitchell, Cardiology

Chief Complaint

Patient reports elevated blood pressure readings at home over the past two weeks. Patient is concerned about cardiovascular health.

Diagnosis

ICD-10 Code	E11.9
Description	Essential (primary) hypertension

Clinical Notes

BP measured at 158/94 mmHg in office. Patient denies chest pain, shortness of breath, or palpitations. EKG shows normal sinus rhythm with no acute changes. Renal function and electrolytes within normal limits. Patient reports good medication compliance with current antihypertensive regimen.

Treatment Plan

Continue current lisinopril 10mg daily and add amlodipine 5mg once daily to improve BP control. Patient instructed on dietary sodium restriction and regular aerobic exercise 30 minutes daily. Schedule repeat BP monitoring in 2 weeks.

Follow-Up

Return to clinic in 2 weeks for BP recheck and medication adjustment if needed. Monitor home blood pressure daily and keep a log. Call office immediately if experiencing chest pain, severe headache, or vision changes.
