

Clinical Visit Note

Aevara Medical Group — Confidential Patient Record

Patient Information

Patient Name	Robert Martinez
Date of Birth	1949-05-30
Visit Date	2024-01-10
Provider	Dr. Sarah Mitchell, Cardiology

Chief Complaint

Patient reports persistent elevated blood pressure readings at home over the past two weeks.

Diagnosis

ICD-10 Code	J45.50
Description	Essential hypertension

Clinical Notes

Physical examination reveals BP 158/94 mmHg in both arms. Patient has been compliant with current antihypertensive medication (Lisinopril 10mg daily). No signs of end-organ damage noted on examination. EKG shows normal sinus rhythm without acute changes.

Treatment Plan

Increase Lisinopril dosage to 20mg daily and add Amlodipine 5mg daily for better BP control. Patient counseled on sodium restriction and regular exercise. Recommend home BP monitoring twice daily.

Follow-Up

Return for follow-up visit in 4 weeks. Continue home blood pressure monitoring and keep a log. Contact office if BP exceeds 160/100 or if experiencing chest pain, shortness of breath, or severe headaches.
