

Clinical Visit Note

Aevara Medical Group — Confidential Patient Record

Patient Information

Patient Name	Margaret Chen
Date of Birth	1957-03-15
Visit Date	2024-01-10
Provider	Dr. James Chen, Internal Medicine

Chief Complaint

Patient reports increased thirst, frequent urination, and fatigue over the past month. Recent fasting glucose reading of 185 mg/dL prompted visit.

Diagnosis

ICD-10 Code	J45.50
Description	Type 2 diabetes mellitus without complications

Clinical Notes

Vital signs stable with BMI of 32.1 kg/m². Fasting glucose today measured at 178 mg/dL. Urinalysis shows trace glucose but no ketones. Comprehensive metabolic panel shows normal kidney and liver function. No signs of diabetic neuropathy on foot examination. Ophthalmologic referral recommended for retinal screening.

Treatment Plan

Initiated metformin 500mg twice daily with meals, with plan to titrate to 1000mg twice daily if tolerated. Provided comprehensive diabetes education including dietary modifications, carbohydrate counting, and exercise recommendations. Referred to dietitian for medical nutrition therapy.

Follow-Up

Return in 6 weeks for HbA1c testing and medication tolerance assessment. Schedule ophthalmology appointment within 3 months. Attend diabetes education class offered at clinic next month. Contact

office if experiencing severe hypoglycemic symptoms or persistent gastrointestinal side effects.
